EDUCATION

Government Engineering College, Siwan

Bachelor in Technology in Electrical Engineering

Patna

Aug. 2020 – Aug. 2024

EXPERIENCE

Salesforce Developer Intern

Dec 2022 – Feb 2023

SmartBridge and SmartInternz

Remote

- Gained practical experience in Salesforce development including Organizational Setup, Security, and Process Automation
- Worked with Apex, Flow Builder, Testing, Debugging, and integrated development using VS Code and Salesforce CLI
- Built and deployed Lightning Web Components (LWC) and utilized Salesforce APIs for custom functionality
- Earned three Salesforce Superbadges: Apex Specialist, Process Automation Specialist, and Developer Super Set

Cloud Computing with Aws

June 2022 – July 2022

Internshala Training

Remote

- Completed comprehensive training in AWS covering Cloud Computing fundamentals and core services
- Gained hands-on experience with AWS Identity Access Management (IAM), S3, VPC, and EC2
- Learned AWS architecture, databases, advanced services, security, management tools, billing, and pricing
- Concluded training with a capstone project demonstrating end-to-end AWS deployment skills

PROJECTS

AI GPT Clone | *React.js, Vite, MongoDB, Node.js, Express.js, gemini model API*

2025

- Built a ChatGPT-like AI application supporting multi-functional text and image generation
- Implemented features such as summarization, paragraph writing, image-to-text conversion, and code generation from natural language
- Secured application using API key-based authentication and MongoDB-based session management
- Developed a responsive, interactive UI with React.js, Vite, and Bootstrap
- ([Click here for Website link...](#))

Go Food | *MongoDB, Express, React, Node.js, Bootstrap*

2024

- Developed a responsive food delivery app using the MERN stack
- Used useReducer and Context API for efficient global state management
- Secured user authentication with Bcrypt hashing and session handling
- Stored and managed user interaction data with MongoDB
- ([Click here for Website link...](#))

Education App | *React.js, Framer Motion, TypeAnimation, Bootstrap*

2024

- Built a dynamic educational platform featuring enrollment, program info, and quick inquiry modules
- Implemented multistep forms, UPI/QR-based payments, and React Router for seamless navigation
- Used Framer Motion and TypeAnimation to enhance user interaction and visual appeal
- Designed responsive UI with reusable components and modular architecture
- ([Click here for Website link...](#))

Jarvis Virtual Assistant | *Python, SpeechRecognition, NLP, Gemini API*

2024

- Built a voice-controlled virtual assistant using Python and speech recognition
- Integrated Gemini for intelligent query responses and Wikipedia for factual answers
- Automated system tasks, web searches, and provided real-time weather and time updates
- Enabled interactive user experience through voice commands and NLP

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, HTML/CSS

Frameworks: React, Node.js, Material-UI, FastAPI, MongoDB (Database)

Developer Tools & Platforms: Git/Github, Linux/Shell scripting, Docker, Jenkins, VS Code, Windsurf, Postman

Soft Skills : OS, DBMS, OOPS and Computer Network.
